

Poster session 1: Thursday 4:15-5:15

Poster session 2: Friday 12:30-1:30

Poster session 3: Friday 1:15-2:15

Please be in front of your poster during your allotted presentation session!

Presenter	Poster board #	Presentation session	Title
Pressigout Alexandra	1	Thurs	Does saccadic adaptation alter object size perception ?
Merholz Garance	2	Fri 12:30-1:30	Oscillations modulate attentional search performance periodically
Recht Samuel	3	Thurs	Metacognition of precision and latency during spatial orienting of attention
Senoussi Mehdi	4	Fri 1:15-2:15	Electrophysiological markers of instructed stimulus-response mappings
Lunghi Claudia	5	Thurs	The effect of monetary reward on visual awareness
Aguilar-Lleyda David	6	Fri 12:30-1:30	Confidence as a priority signal in perceptual decision-making
Jovanovic Ljubica	7	Thurs	Timing an action and being confident about it
Matteo Lisi	8	Fri 1:15-2:15	Strictly serial integration of evidence for perceptual decisions and oculomotor responses
Ladret Hugo	9	Thurs	Selectivity to oriented patterns of different precisions
Lebert Angélique	10	Fri 12:30-1:30	How the stimuli properties and the individual characteristics influence the interaction between perception of emotion and postural control?
Matt Stéphanie	11	Thurs	Emotional expressions and context integration at a single glance: an objective signature with electroencephalographic frequency tagging
Wexler Mark	12	Fri 1:15-2:15	Static endpoints modify motion perception
Yan Xiaoqian	13	Fri 12:30-1:30	The speed of familiar face recognition with fast periodic visual stimulation
Volfart Angélique	14	Fri 1:15-2:15	Evidence for integrated face-name representations in the left ventral anterior temporal cortex
Ajasse Suzon	15	Fri 12:30-1:30	Effects of pupillary responses to luminance and attention on visual spatial discrimination.
Cheviet Alexis	16	Fri 1:15-2:15	A new approach to test the effect of saccadic adaptation on visual perception
Hillairet De	17	Thurs	Inducing Voluntary Saccades in Young Children without Task Instruction

Boisferon Anne			
Latil Betty	18	Fri 12:30-1:30	Does saccade adaptation reveal the role of sensorimotor deficits in Autism Spectrum Disorders?
Mansour Pour Kiana	19	Thurs	Effect of speed variability on smooth pursuit eye movement and speed perception
Milisavljevic Alexandre	20	Fri 1:15-2:15	Dynamic behaviour when searching in webpages
Parisot Kevin	21	Fri 12:30-1:30	Quantifying pursuit movements through measures of spatio-temporal similarity
Perrinet Laurent	22	Fri 1:15-2:15	A low-cost, accessible eye tracking framework
Collins Thérèse	23	Fri 12:30-1:30	Serial effects in covert spatial attention
Tagu Jérôme	24	Fri 1:15-2:15	Does eye dominance influence oculomotor and/or attentional selection?
Vencato Valentina	25	Fri 12:30-1:30	Reaction time estimation in saccadic and arm movement.
Montagnini Anna	26	Fri 1:15-2:15	Assessing the dynamic visual processing of informative local features with eye movements
